**electronica Embedded—Exhibition concept based on three strong pillars**

The electronica concept consists of three pillars. The embedded segment is broken down the same way—i.e. into the exhibition, the Embedded Forum and the Embedded Platforms Conference. That allows you to gather comprehensive information about the trends, products, technologies and markets in the embedded sector.

**The exhibition sector**

Generally speaking, solutions for the embedded sector can be found in a variety of the fair’s segments. However, this exhibition segment revolves around suppliers that focus on embedded solutions. Among other things, their exhibits include products and services in the following fields:

- Industry PCs
- Industrial control units
- Calculation, analysis and simulation tools
- Software debugging solutions
- Complete development tools for microcontrollers

> Exhibitors in the Embedded sector

**The conference**

The electronica Embedded Platforms Conference (EPC) is a communication platform for suppliers of components, tools, software and solutions. On the one hand, it focuses on the requirements and challenges facing embedded platforms now and in the future. On the other, it presents solution modules that are available now and that will be available in the future.

**The EPC in 2018:**

- Nearly 200 participants from over 20 countries
- More than 34 lectures and concluding discussions
- 98 percent of visitors gave the conference a rating of good to excellent

**Save the date**

electronica | World’s leading trade fair and conference for electronics
Date: Nov 10 - 13, 2020
The Forum
The Embedded Forum is located in the middle of the exhibition hall. Lectures and panel discussions take place here on a regular basis on all four days of the fair. This allows visitors to expand their knowledge about the latest developments that pertain to embedded systems. Attending all electronica Forum events is included in the price of admission.

The Embedded Forum in 2018:
✓ More than 1,035 participants
✓ More than 40 lectures
✓ 95 percent of visitors gave the forum a rating of good to excellent
