

Fairgrounds map of electronica 2018

electronica 2018 was bigger than ever before, and (along with its co-located event SEMICON Europa) filled 17 halls for the first time. Five entrances and the fast lanes on the upper floors of the halls guaranteed that professional visitors could reach their areas of choice as quickly as possible.

Save the date

electronica | World's leading trade fair
 and conference for components, systems,
 applications and solutions

Date: Nov 10 - 13, 2020

electronica 2018—New hall layout

The exhibition space has increased significantly compared to the last electronica and now includes SEMICON Europa, Halls C2–C3 and the new Halls C5 and C6. This year, the North, North-West and North-East entrances were available for fast access in addition to the previously available East and West entrances.

This growth is also associated with a new positioning of the product segments:

- ✓ The focus topic of **semiconductors** will be featured in **halls A4, B4–B5 and C3–C6** with direct access via the North and North-East entrances.

- ✓ **EMS electronic manufacturing services, printed circuit boards and other unassembled circuit carriers** can be found in **halls A1 and B1** toward the west to be accessed via the West Entrance.
- ✓ **Electromechanics and system peripherals**—both **enclosure technology and connection components/systems**—can also once again be found in the western **halls A2, B2–B3 and C2**.
- ✓ Everything about **power supply** is located in the eastern **halls A5–A6**.
- ✓ **SEMICON Europa** takes place as a co-located event in hall A4.
- ✓ **NEW: Hall C6** is home to the **electronica Experience**—the new electronics experience and career event of electronica.
- ✓ **NEW: All electronica Conferences** (eMEC, eAC, eEPC, Wireless Congress) will take place centrally at the **ICM** and can be reached via the West Entrance.
