

## Talent meets Industry

Future prospects for high-school and college students, specialists and start-ups: The international trade fair **electronica** matches talented people who are enthusiastic about electronics with companies in the industry

Innovation and quality are the strong pillars of electronics. To ensure that they stay that way, it is important to find young talent, retain qualified professionals and support founders. **electronica** is the perfect place to do so.

High-school and college students, specialists, start-ups, established companies and investors: **electronica** brings them all together. Our initiative helps young people with talent stay oriented, networks career engineers and professionals with leading employers and generates a great deal of attention for innovative start-ups. In short: **We showcase, we network and we support talent!**

### We showcase talent

A growing number of innovations on the electronics market come from start-ups. **electronica Fast Forward, the Start-up Platform powered by Elektor**, puts a spotlight on them.

This is where start-ups present their ideas, prototypes, products and services in pitches, demonstrations and personal conversations. Young companies get valuable tips within the scope of their own forum program and with the support of experienced consultants. And the best of the best will receive the **electronica Fast Forward Award!**

### We network talent

Are you an electronics professional who is looking for new challenges? Or a student who is getting ready to start a career in the industry? Or would you like to find out what it's like to work at a company as part of a student internship? **electronica Careers** will help you make your next career move.

## Save the date

**electronica | World's leading trade fair and conference for components, systems, applications and solutions**

Date: Nov 10 - 13, 2020

### **Talent Meets Opportunity**

Experience a wide range of demos featuring the latest applications and developments, as well as workshops, presentations on current trends, discussions, the IMPACT developer lounge, and other live events. Not only does the electronica Experience bring the world of electronics to life while simultaneously offering a glimpse into the industry's future, it also introduces young professionals to potential employers. The large discovery stage inside our new hall, Hall C6, acts as a one-of-a-kind platform for inspiring current and upcoming trends while also promoting industry exchange and networking.

Engineers, CEOs, developers, industry representatives, young people, and those in the early stages of their careers are all more than welcome to be a part of the electronica Experience!
